### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hager et al.(6,391,935).

Hager et al. discloses preparations of viscoelastic polyurethane foams and polyol compositions used in such preparations wherein the polyol compositions employed include various polyoxyethylene-polyoxypropylene polyols of diverse ethylene oxide contents and primary hydroxyl contents, chain extenders inclusive of polyoxyalkylene glycol, polyoxyalkylene monool, and wherein the polyol compositions are mixed and reacted with polyisocyanates in the presence of water and additives (see abstract, column 3 line 10 – column 5 line 65, as well as, the entire document).

Hager et al. differs from the claims in that blends of the marked EO contents and primary hydroxyl contents as claimed. However, Hager et al. (see again column 4 lines 49-55) sets forth the criteria necessary to control contents of these various factors for the purpose of controlling configurations of reactive materials. Accordingly, it would have been obvious for one having ordinary skill in the art to have controlled the alkylene oxides contents and primary hydroxyl contents as prescribed by Hager et al. for the purpose of controlling product effects in order to arrive at the products and processes of

applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gansen et al. (5,063,253) is cited for its disclosures or relevant materials in the art.
